- **Language Skills:** Fluent in Bangla ,English and German (written and spoken)
- **Soft Skills:** Problem-solving and analytical thinking, Ability to learn quickly and adapt to new technologies, Teamwork and collaboration ,Good communication skills, , adaptability.

Academic Projects / Research :

1.

Title: “Crypto Flow” – A Modern Centralized Crypto Exchange Platform.

Description: This project involves the design and development of **CryptoFlow**, a modern centralized cryptocurrency exchange platform. It is built using HTML, CSS, JavaScript, React, and integrates necessary APIs for real-time data and transactions. The system enables secure, efficient, and user-friendly cryptocurrency trading while demonstrating modern web development and fintech integration techniques.

Supervisor: Md. Hamid Uddin, Department of Computer Science.

2.

Title: Evaluating the expense of diabetes and its effect on Bangladesh healthcare economy.

Description: This study analyzes the economic impact of diabetes on Bangladesh’s healthcare system using data from 2000–2024 collected from IDF, WHO, and BBS reports. It examines the trends in diabetes prevalence and associated direct and indirect medical costs. The findings highlight a significant increase in diabetes cases and healthcare expenditures, indicating a growing economic burden on the country’s healthcare sector.

Supervisor: Md. Mortuza Ahammed, Department of Mathematics.

Extracurricular Activities

- Captain of school team – Inter-School Football Championship
- Member of Scouts Program – actively participated in community service activities
- Volunteer at “Love for Blood” organization, participated in blood donation .
- Attended seminar: “*Cybersecurity Trends and Network Safety in Modern IT*”
